PUC Issues Initial Decision for the Amendment of the BEL ARP 2025 Final Decision

The Public Utilities Commission (Commission) in accordance with the process prescribed in the Electricity (Tariffs, Fees and Charges) Byelaws hereby informs the public that it has issued a final draft of the amendments of the BEL 2025 ARP Final Decision.

Belize Electricity Limited (BEL) requested an adjustment to the Mean Electricity Rate (MER) by \$0.0555 per kWh. After reviewing thoroughly, the Commission proposes an adjustment to the MER by \$0.0337 per kWh resulting in a new MER of \$0.4427 per kWh. This proposal reflects the urgent need to address BEL's financial challenges and allow them the opportunity to recover the reasonable cost of services.

In determining the tariffs, the Commission was mindful of social and residential customers who currently fall below the GST threshold. Therefore, the adjustment to the MER will be distributed among those consumers to minimize the impact on their bills.

The Commission's Decision may be viewed in its entirety at www.puc.bz. BEL and interested parties may submit written comments by December 22, 2025 to info@puc.bz, by mail to PO Box 300 in Belize City, or by hand delivery to our offices.
